Work Experience

Sep 2024 - Nov 2024

Frontend Developer Intern - Go Think Digital

Developed responsive web applications using React.js and Tailwind CSS, focusing on interactive user interfaces and seamless API integration. Enhanced skills in performance optimization and adhering to best coding practices. Collaborated with cross-functional teams, contributing to efficient project development.

Projects

CodeSphere - Online Code Editor

Live Demo: [Click here](#)

CodeSphere is a web-based code editor supporting multiple programming languages. It offers a seamless coding experience with syntax highlighting, code execution, and real-time output visualization. Built with React, Chakra UI, and powered by the Piston API, it provides a clean and efficient coding environment.

Crypto App

Live Demo: [Click here](#)

This app utilizes cryptocurrency APIs to provide real-time data and features three main pages: Crypto, Trending, and Saved. The Crypto page displays a list of cryptocurrencies, the Trending page highlights the most popular coins, and the Saved page allows users to save their favorite coins. The application also includes functionalities like concurrent search, pagination, and sorting.

Shopix- Ecommerce Website

Live Demo: [Click here](#)

This ecommerce app, built with React.js and Tailwind CSS, allows users to browse separate categories for men and women and use a search bar to find specific products. Users can add items to the cart, remove items, and view the total price. The app also suggests related products and includes a simple checkout form.

Vocabulary Spark - Chrome Extension

Vocabulary Spark is your go-to tool for discovering new words with ease. Each time you use it, you'll get a word along with its meaning and pronunciation. It was designed to enhance your vocabulary effortlessly!
